LAW ENFORCEMENT

Our Story

10-75 Emergency Vehicles was founded in 2006 by Larry Kohan with one goal, to provide functional, reliable, and reasonably priced emergency vehicles. Larry is a law enforcement officer with over 20 years of experience. In addition to his law enforcement background, he has served as a Fire Chief in his hometown Fire Department. His experiences in both fields have helped him identify the best products for the public safety professional.

10-75 Emergency Vehicles is a single source manufacturer for emergency vehicle products for law enforcement, fire departments, and emergency medical service agencies. We pride ourselves in managing all aspects of our customer's vehicle conversion, from conception to completion. There is not a job that we can't make happen. Every department has a different mission, and we understand that every vehicle has a different purpose.

Therefore, we take the time to understand what your vision and mission are for your vehicle. Vehicles manufactured by us for our customers have a combination of the highest level of safety, appearance, and purpose while keeping the factory design.

Today, all of our sales and service representatives are serving in Public Safety Sectors. Our company goal today is the same as when it was founded, to provide the highest quality product at the best price.

With Ford Motor Company discontinuing the Crown Victoria Police Interceptor a huge gap was created along with some major automakers discontinuing production of sedans, the SUV in most cases has stepped up to fill that role. They provide a larger platform giving the officers more room for themselves and their equipment.

- Patrol Vehicle
- Emergency Services

Sedans have been the choice of law enforcement vehicles for decades. They provide a smaller footprint and in some cases are more maneuverable.

PICKUPS

The demand for police to increase the services they provide has increased rapidly.

It's no surprise that the equipment they need to carry is not all going to fit into a standard patrol car. Emergency Service Units also called ESU or Patrol Service Units have been deployed to provide a dedicated unit to serve the communities. A pickup truck with a truck cap or truck insert provides a versatile platform for customizing the vehicle to suit the department's mission. With options for weapons vaults, equipment storage, light towers, and winches we have the knowledge to manufacture your vehicle. Traffic units can be outfitted to easily deploy road barricades, traffic signs, and cones.

ELECTRICAL SYSTEM

Our vehicle electrical systems are designed with the customer in mind. Simplicity and Serviceability are key to hassle-free and long-lasting electrical systems.

- All equipment shall be installed as per manufacturer's specifications.
- All wiring will be GXL SAE J1128 wire, custom cut, and function printed every 4", and run for the equipment installed
- All wiring shall be separate and isolated from the vehicles electrical system and shall not utilize the vehicles factory wiring harness.
- Wiring will be covered in a black split loom with a gray stripe to identify it from the factory wiring harness and will be rated up to 257 degrees Fahrenheit
- All connections will be Molex Perma-Seal heat shrink connections
- Battery Upgrades
- Idle System
- Shoreline
- Inverter
- Alternator Upgrades
- OBDII interfaces

GRAPHICS

Vehicle graphics are an important component of a vehicle. By utilizing quality materials and installation procedures, the graphics will last the lifetime of the vehicle and provide the safety you need.

We use only quality 3M Scotchlite Reflective Graphic Film 680CR material.

This material will ensure that your vehicle graphics last for the life of your vehicle. Also, it can provide printing of your images onto the reflective material.
