# FIRE SERVICES

# Our Story

10-75 Emergency Vehicles was founded in 2006 by Larry Kohan with one goal, to provide functional, reliable, and reasonably priced emergency vehicles. Larry is a law enforcement officer with over 20 years of experience. In addition to his law enforcement background, he has served as a Fire Chief in his hometown Fire Department. His experiences in both fields have helped him identify the best products for the public safety professional.

10-75 Emergency Vehicles is a single source manufacturer for emergency vehicle products for law enforcement, fire departments, and emergency medical service agencies. We pride ourselves in managing all aspects of our customer's vehicle conversion, from conception to completion. There is not a job that we can't make happen. Every department has a different mission, and we understand that every vehicle has a different purpose.

Therefore, we take the time to understand what your vision and mission are for your vehicle. Vehicles manufactured by us for our customers have a combination of the highest level of safety, appearance, and purpose while keeping the factory design.

Today, all of our sales and service representatives are serving in Public Safety Sectors. Our company goal today is the same as when it was founded, to provide the highest quality product at the best price.

## SUV

The **Sport Utility Vehicle (SUV)** has been a staple for Fire Service as it is extremely versatile and can perform in different missions.

### Choose your mission:

- Batalion Chief
- First Responder
- Hazmat
- Incident Command

## PICKUP

As the fire service evolves we take on more roles and responsibilities which means more equipment and technology. We can only fit so much equipment in an SUV. **Pickup trucks** are becoming more popular to fill that void.

### Choose your mission:

- Batalion Chief
- Fire Police
- First Responder
- Hazmat
- Incident Command

# CAB AND CHASSIS

## DO YOU NEED SOMETHING BIGGER? CAB AND CHASSIS MAY BE A GOOD OPTION FOR YOU!

- Brush Truck
- Light Rescue
- Utility
- Fire Police
- First Responder
- Hazmat
- SWAB Champion Series
- SWAB Commander Series
- SWAB Skidder Body

## MORE AVAILABLE FIRE SERVICES

### TOOL MOUNTING

### REFURB AND UPGRADES

### DRONE DEPLOYMENT

### UTV

## ELECTRICAL SYSTEM

Our vehicle electrical systems are designed with the customer in mind. Simplicity and Serviceability are key to hassle-free and long-lasting electrical systems.

- All equipment shall be installed as per manufacturer's specifications.
- All wiring will be GXL SAE J1128 wire, custom cut, and function printed every 4", and run for the equipment installed
- All wiring shall be separate and isolated from the vehicles electrical system and shall not utilize the vehicles factory wiring harness.
- Wiring will be covered in a black split loom with a gray stripe to identify it from the factory wiring harness and will be rated up to 257 degrees Fahrenheit
- All connections will be Molex Perma-Seal heat shrink connections
- Battery Upgrades
- Idle System
- Shoreline
- Inverter
- Alternator Upgrades
- OBDII interfaces

## GRAPHICS

Vehicle graphics are an important component of a vehicle. By utilizing quality materials and installation procedures, the graphics will last the lifetime of the vehicle and provide the safety you need.

We use only quality 3M Scotchlite Reflective Graphic Film 680CR material.

*This material will ensure that your vehicle graphics last for the life of your vehicle. Also, it can provide printing of your images onto the reflective material.*
