EMS VEHICLES

Our Story

10-75 Emergency Vehicles was founded in 2006 by Larry Kohan with one goal, to provide functional, reliable, and reasonably priced emergency vehicles. Larry is a law enforcement officer with over 20 years of experience. In addition to his law enforcement background, he has served as a Fire Chief in his hometown Fire Department. His experiences in both fields have helped him identify the best products for the public safety professional.

10-75 Emergency Vehicles is a single source manufacturer for emergency vehicle products for law enforcement, fire departments, and emergency medical service agencies. We pride ourselves in managing all aspects of our customer's vehicle conversion, from conception to completion. There is not a job that we can't make happen. Every department has a different mission, and we understand that every vehicle has a different purpose.

Therefore, we take the time to understand what your vision and mission are for your vehicle. Vehicles manufactured by us for our customers have a combination of the highest level of safety, appearance, and purpose while keeping the factory design.

Today, all of our sales and service representatives are serving in Public Safety Sectors. Our company goal today is the same as when it was founded, to provide the highest quality product at the best price.

SUV

With the increase in the amount of equipment transported Paramedics, MICU, and ALS a vehicle with a larger Gross Vehicle Weight rating may be necessary. These vehicles allow for more customization to help you fulfill your missions.

Choose your mission:

- ALS
- BLS
- First Responder
- EMS Transport
- Incident Command

PICKUP

SUVs have been the traditional vehicle chassis for Paramedics. They provide a low to the ground entrance and large enough cargo area to store their medical equipment and pharmaceuticals.

Choose your mission:

- ALS
- BLS
- Light Rescue
- EMS Transport
- Incident Command
- First Responder
- Utility
- SWAB

CUSTOM PRODUCTS

Our products are created for the customer to have a combination of the highest level of safety, appearance, and purpose while keeping the factory design.

- Our products are designed with a 3-D CAD program, precise and accurate!
- Joint construction is the foundation for our cabinets.
- Faceplates and accessories are all manufactured from a marine grade HDPE plastic.
- All of the products are profiled and sanded to ensure a seamless and uniform finish.
- TOUGHcoat is a polyurethane based coating system that is designed to provide tough and durable protection.

ELECTRICAL SYSTEM

Our vehicle electrical systems are designed with the customer in mind. Simplicity and Serviceability are key to hassle-free and long-lasting electrical systems.

- All equipment shall be installed as per manufacturer's specifications.
- All wiring will be GXL SAE J1128 wire, custom cut, and function printed every 4", and run for the equipment installed
- All wiring shall be separate and isolated from the vehicle's electrical system and shall not utilize the vehicle's factory wiring harness.
- Wiring will be covered in a black split loom with a gray stripe to identify it from the factory wiring harness and will be rated up to 257 degrees Fahrenheit
- All connections will be Molex Perma-Seal heat shrink connections
- Battery Upgrades
- Idle System
- Shoreline
- Inverter
- Alternator Upgrades
- OBDII interfaces

GRAPHICS

Vehicle graphics are an important component of a vehicle. By utilizing quality materials and installation procedures, the graphics will last the lifetime of the vehicle and provide the safety you need.

We use only quality 3M Scotchlite Reflective Graphic Film 680CR material.

This material will ensure that your vehicle graphics last for the life of your vehicle. Also, it can provide printing of your images onto the reflective material.

MAB

MEDICAL AMBULANCE BUS

An ambulance bus, MAB, or MCI is a type of ambulance used to transport and treat multiple patients who require ambulance-level care.

Ambulance buses have been used for a number of different purposes including mass casualty incident response, disaster response, large events, and others who require non-ambulatory transport.
